

# Stephanie Liu

*Design engineer who builds the whole thing — research, interface, code.*

*Drawn to tools that make hard systems feel obvious, and to software that's patient with the people using it.*

## CONTACT

San Francisco, CA

[stxphanieliu@gmail.com](mailto:stxphanieliu@gmail.com)

Portfolio: [stxphanie.com](http://stxphanie.com)

[github.com/sliuu](https://github.com/sliuu)

[linkedin.com/in/stephanieliu14](https://linkedin.com/in/stephanieliu14)

## SKILLS

### DESIGN

Figma, prototyping, design systems, interaction design, UX research

### FRONT-END

TypeScript, JavaScript, Angular, Lit, React, Ruby on Rails, HTML/CSS, D3.js, Tailwind

### ALSO FAMILIAR

Python, SQL, Go, C++, data pipelines & viz (Pandas, Plotly, BigQuery, Dataform)

## EDUCATION

### Williams College

B.A. Economics & Computer Science, 2018

GPA 4.0 · Phi Beta Kappa · MIT EECS study-away

## EXPERIENCE

### Design Engineer · Independent

May 2026–present

- **Baby Steps** — a simple, satisfying habit tracker for habits built over months, not days, on the premise that habits form slowly and taking time off is fine. In use by a small group of friends. [baby-steps.stxphanie.com](http://baby-steps.stxphanie.com)
- **Somatic therapy chat** — a chat interface for somatic therapy practice. *In progress.*

React · TypeScript · Figma · motion design

### UX Engineer · Google

Feb 2025–Oct 2025

- Took engineering out of the loop for YouTube ad-format research studies — re-designed an internal prototyping tool so the 4–5 UX designers and researchers on it could build functioning prototypes themselves.
- Built YouTube Shorts prototypes for user research and shipped toolkit capabilities supporting 5–10 research studies.

Lit · TypeScript · CSS · Figma

### Software Engineer · Waymo

Nov 2022–Feb 2025

- Built the internal labeling platform delivering high-quality, low-cost, diverse labeled datasets to Waymo ML teams.
- Opened labeling to non-technical users — designed a new self- and auto-labeling interface as LLM capabilities grew.
- Simplified a complex label-request workflow into a guided multi-step form, projected to let 70%+ of requests be made without engineering involvement.
- Primary liaison between AI/ML engineering and internal labeler teams; turned feedback into prioritized changes and rollout plans.
- Partnered with the India labeling team to build a faster, more intuitive way to verify label accuracy and respond to feedback.

Angular · TypeScript · CSS · C++ · Python · Figma

### UX Research (20%) · Waymo

Aug 2023–May 2024

- Interviewed riders and ran a 4-week pickup/dropoff diary study for the Waymo rideshare app in SF and Phoenix; analyzed and visualized results into a final presentation.
- Synthesized qualitative and quantitative feedback into actionable product recommendations.

Colab · Python · Plotly · SQL

### Analytics Engineer · Nuro

Mar 2021–Oct 2022

- Overhauled the org's pipelines, data lakes, and workflows in Dataform; consolidated sources and wrote the documentation that made data easier to analyze and debug.
- Owned Cost-Per-Mile monitoring scripts and dashboards referenced weekly by operations leads.

Go · Python · JavaScript · Airflow · SQL · BigQuery

### Software Engineer · Google

Oct 2018–Mar 2021

- Built a logistic-regression model predicting display-ad callout quality to throttle low-value callouts — \$80M ARR; owned serving, pipelines, dashboards, and the TensorFlow model.

C++ · Python · JavaScript · SQL · Pandas · TensorFlow
